

synthesis of heterocycles via pdf

Synthesis. Tetrazole was first prepared by the reaction of anhydrous hydrazoic acid and hydrogen cyanide under pressure. Treatment of organic nitriles with sodium azide in the presence of iodine or silica-supported sodium bisulfate as a heterogeneous catalyst enables an advantageous synthesis of 5-substituted 1H-tetrazoles. 2-Aryl-2H-tetrazoles are synthesized by a [3+2] cycloaddition reaction ...

Tetrazole - Wikipedia

Many methods in ester synthesis can also be applied to that of lactones. In one industrial synthesis of oxandrolone the key lactone-forming step is an organic reduction - esterification.

Lactone - Wikipedia

The front cover picture, provided by Stephen Hashmi and co-workers, represents the result of their work on establishing a fundamental set of N-oxides in homogeneous oxidative gold catalysis. This basic set of N-oxides should be an integral component in each reaction optimization which allows identification of the best N-oxide in less steps.. This is illustrated in the cover picture by ...

Organometallics (ACS Publications)

Sodium triacetoxyborohydride is presented as a general reducing agent for the reductive amination of aldehydes and ketones. Procedures for using this mild and selective reagent have been developed for a wide variety of substrates.

Reductive Amination of Aldehydes and Ketones with Sodium

The development of visible-light-mediated allylation of unactivated sp³ C-H bonds is reported. The remote allylation was directed by the amidyl radical, which was generated by photocatalytic fragmentation of a pre-functionalized amide precursor.

Angewandte Chemie International Edition: Early View

Epoxy resins (EPs), as a class of thermosets, are known as all-powerful adhesives due to their strong mechanical properties, low shrinkage, low density, outstanding adhesion, excellent versatility, excellent weather and chemical resistance, and high thermal stability, and therefore EPs have a broad range of applications .These include applications as electrical insulating materials, coatings ...

Synthesis and application of epoxy-ended hyperbranched

The rapid increase in the breadth and scope of transformations that involve metal-promoted activation of C H bonds is fundamentally changing the field of synthetic chemistry. Direct arylation polymerization is a newly established synthetic protocol for atom economical, effective, and affordable preparation of conjugated polymers, which continue to be incredibly advantageous as operative ...
