The Chem1 Virtual Textbook is a free resource aimed mainly at the first-year university level. It offers a more comprehensive, organized, and measured approach than is found in most standard textbooks.

Chem1 Online Textbook Main Menu

Hearing range describes the range of frequencies that can be heard by humans or other animals, though it can also refer to the range of levels. The human range is commonly given as 20 to 20,000 Hz, although there is considerable variation between individuals, especially at high frequencies, and a gradual loss of sensitivity to higher frequencies with age is considered normal.

Hearing range - Wikipedia

Preface Elementary Differential Equations with Boundary Value Problems is written for students in science, engineering, and mathematics who have completed calculus through partial differentiation.

Welcome! Random is a website devoted to probability, mathematical statistics, and stochastic processes, and is intended for teachers and students of these subjects. The site consists of an integrated set of components that includes expository text, interactive web apps, data sets, biographical sketches, and an object library.

Random: Probability, Mathematical Statistics, Stochastic

Introduction. Instruction in Virginia's public schools is guided by the Standards of Learning. The standards describe the commonwealth's expectations for student learning and achievement in grades K-12 in English, mathematics, science, history and social science, technology, the fine arts, foreign language, health and physical education and driver education.

PREFACE This is the First Edition of Experiments in Materials Science and Engineering. The principal idea behind this textbook arose from the need to consolidate experimental laboratory procedures

Experiments in Materials Science and Engineering

A condenser is an apparatus or item of equipment used to condense (change the physical state of a substance from its gaseous to its liquid state). In the laboratory, condensers are generally used in procedures involving organic liquids brought into the gaseous state through heating, with or without lowering the pressure (applying vacuum) although applications in inorganic and other chemistry ...
